PLACE ACQUIRED		REQUIREMENT	
	This is UNEVALUATED	REFERENCES	

THE SOURCE EVALUATIONS IN THIS REPORT ARE DEFINITIVE.
THE APPRAISAL OF CONTENT IS TENTATIVE.
(FOR KEY SEE REVERSE)

1. Microwave circuits are in operation between Berlin and Brocken (Harz Mountains) and between Berlin and Leipzig.
2. A radio test program (Funk-Messprogramm) is functioning; RFT Leipzig is heading its development.
3. 200 fixed jamming transmitters have been ordered from TBN (Technisches Buero fuer Nachrichtenmittel) (branch plant of the HF Werk) for the Post Research Center (Post-Versuchs-Zentrale)(PVZ). The PVZ has also ordered one mobile jamming transmitter from VEB Funkwerk Koepenick. The necessary generator unit (Motor-Aggregat) for the mobile unit will have to be procured from the West German Humboldt-Deutz company.
4. VEB Funkwerk Koepenick develops and constructs ultrashort wave and television transmitters. Radar equipment for 3 cm wavelength use is also developed and constructed here. The principal engineers engaged in this work, as of 27 April 1954, were Dr. Erich Schuettloeffel, Rudolph Manthey, and Heinz Munte.
